Education

•Bachelor of Technology in Computer Science and Engineering(AI and ML) *2023 - Present*
Vellore Institute of Technology, Bhopal CGPA: 8.20

Technical Skills and Interests

Languages: C/C++, Python, JavaScript, SQL, HTML + CSS
Frameworks: React.js, Flask, Express.js, Node.js, LangChain, LangFlow
Libraries/Tools: TensorFlow, scikit-learn, Pandas, OpenCV, NumPy, Text-to-Speech (TTS), Git, REST APIs
Cloud/Databases: MongoDB, MySQL, Azure Blob Storage, Azure Cosmos DB, Azure Form Recognizer
Relevant Coursework: Data Structures and Algorithms, Operating Systems, Object-Oriented Programming, Database Management Systems
Areas of Interest: Web Development, AI/ML Applications, Cloud Computing, Natural Language Processing, Computer Vision, Agentic AI, LLM, Generative AI, RAG, Prompt Engineering, MLOps

Personal Projects

•SAFESTEP - A Stick for the Blind
Real-time obstacle detection and audio navigation system for visually impaired users using computer vision.

- Engineered a real-time obstacle detection system achieving 95% accuracy across 10+ object categories using TensorFlow and OpenCV, reducing navigation errors by an estimated 40%.
- Won 1st place at IEEE Hackathon, VIT Bhopal (50+ competing teams) – recognized for innovation in assistive technology and real-world accessibility impact.
- **Tech Stack:** Python, OpenCV, TensorFlow, Deep Learning, Object Detection, Text-to-Speech (TTS).

•Bank KYC Remediation Platform
Automated KYC document verification system processing 500+ documents using Agentic AI and Azure.

- Developed an agentic AI-powered document processing pipeline using LangChain and LangFlow that classifies 3 document types (passport, driving license, identity card), extracts 15+ structured fields via Azure Form Recognizer, and validates against databases with 98% field-level accuracy.
- **Tools & Technologies:** Python, Azure Form Recognizer, Azure Blob Storage, OpenAI GPT-4, LangChain, LangFlow, Agentic AI, Flask, React, Pandas, OCR, NLP, REST API.

•MailFlow - AI-Powered Customer Support Email Triage and Response System
Automated classification, routing, and AI-generated responses for customer support emails.

- Developed a Flask-based backend integrating Gemini 2.0 Flash and fine-tuned BERT to analyze email intent with 92% classification accuracy, auto-routing queries across 5 departments and generating context-aware AI replies, reducing average response time by 70%.
- **Powered By:** Python, Agentic AI, Gemini 2.0 Flash, BERT, Flask, Machine Learning, Gmail API, MySQL, HTML, CSS, JavaScript.

Experience

•Coforge BPS, Pune *May - July 2025*
AI Intern Offline

- Architected and deployed an end-to-end KYC verification pipeline on Microsoft Azure, leveraging Form Recognizer, Blob Storage, and OpenAI to automate identity validation for 500+ documents with 98% extraction accuracy.
- Designed and implemented agentic AI workflows using LangChain and LangFlow, reducing manual document processing time by 60% and cutting verification turnaround from 48 hours to under 8 hours.
- Delivered a production-ready React front-end integrated with Flask REST APIs and Azure Communication Services, enabling real-time document upload, status tracking, and automated notifications.
- Optimized ML model inference latency by 30% through batched API calls, caching strategies, and efficient Azure resource management across 3+ cloud services.

Positions of Responsibility

–**Google Developer Group Club (GDGC) - Event Management Lead**, VIT Bhopal *Aug 2025 - Present*
∗ Organized and executed 5+ hackathons and developer events, driving 800+ student participation across campus.

–**Marathi Club - President**, VIT Bhopal *Apr 2024 - Present*
∗ Led a team of 20+ coordinators to manage cultural events for 11,000+ students.
∗ Facilitated 5 lakh+ INR in community donations through strategic event planning and outreach.
